

ALFRESCO REFRIGERATORS

ALFRESCO LUXURY ENTERTAINMENT AT IT'S BEST

The Napoleon outdoor refrigerator collection is the ideal way to finish off your backyard. These tropical rated commercial outdoor refrigerators will perfectly cool your food and beverages between 0 and 10 degrees Celsius in shaded temperatures as high as 43 degrees Celsius.

The triple-glazed heated glass doors and fan-forced construction of the refrigerators will evenly manage the temperature and prevent condensation in humid environments. You won't ever have to worry about the fridge frosting again thanks to the auto defrosting feature with inbuilt electronic thermostat.

The single or double door fridge may be installed both indoors and outdoors because it is made of non-ferrous 304 stainless steel with an IP34 rating for added durability. A tight fit is made possible by the adjustable feet and built-in zero clearances.
